

CLAIMS

1. (currently amended) An interior light assembly for motor vehicles, the interior light assembly comprising:
a frame having a frame opening and defining an interior of the interior light assembly;
at least one lens arranged in connected to the frame and filling out the frame opening;
at least one illumination element and at least one electroluminescent film arranged within the area of the frame opening behind the at least one lens in an the interior of the interior light assembly so that light emitted by the ; and at least one illumination element and the at least one electroluminescent film passes from the interior through the at least one lens arranged in the frame opening for illuminating a vehicle interior arranged behind the at least one lens in the interior of the interior light assembly.
2. (previously amended) The interior light assembly according to claim 1, wherein the at least one electroluminescent film is attached to a backside of the at least one lens facing the interior of the interior light assembly.
3. (previously amended) The interior light assembly according to claim 1, wherein the at least one electroluminescent film has a contour identical to a contour of the at least one lens.
4. (previously amended) The interior light assembly according to claim 1, wherein the frame surrounds the at least one lens.
5. (previously amended) The interior light assembly according to claim 1, wherein a first one of the at least one lens is correlated with the at least one illumination element and a second one of the at least one lens is correlated with the at least one electroluminescent film.
6. (previously amended) The interior light assembly according to claim 5, wherein the first lens for the at least one illumination element is smaller than the second lens for the at least one electroluminescent film.
7. (previously amended) The interior light assembly according to claim 5, wherein the first lens for the at least one illumination element has a backside facing the

interior of the interior light assembly and provided at least partially with at least one optic.

8. (previously amended) The interior light assembly according to claim 7, wherein the at least one optic is comprised of serrations or corrugations.

9. (previously amended) The interior light assembly according to claim 1, wherein the at least one illumination element is an incandescent light bulb.
